PROJECTS

News App | *HTML, CSS, JavaScript, </newscatcher> API*

[GITHUB](#)

- Developed the website which provides the latest news in card format along with stunning animations.
- The site features a stunning visual carousel that displays the top 20 latest news and the changes in the world in the last 24 hours.
- The website fetches data through **API** of *</newscatcher>*.
- Clicking on a specific news card directs you to the specified news article where you can get complete information about the particular news.

BMI Calculator | *JavaScript, HTML, CSS*

[GITHUB](#)

- Designed a Body Mass Index calculator using **HTML, CSS, and JavaScript**.
- Showcases an individual's Health condition based on their height and weight and the ratio provided.

Poster Template 1 | *Canva*

[LINK](#)

- A minimal app to store and keep a track of your favorite songs. Music Player is written in **JavaScript, HTML, and CSS** and themed to look somewhat similar to Spotify.
- The frontend is implemented within an **object-oriented Javascript** framework that allows users to either create a list of songs or delete any added songs.

Poster Template 2 | *Canva*

[LINK](#)

- A personal portfolio website designed using **HTML, CSS, and JavaScript**.
- Showcases an about me page, an achievements page, my projects and a contact me section.
